LEONARDO J. MONAY

Full Stack JavaScript Developer · Industrial Engineer · Teacher

San Nicolás de los Arroyos, Buenos Aires, Argentina leonardomonay@gmail.com +54 9 336 432-6286 leomonay.github.io
linkedin.com/in/leomonay github.com/Leomonay

Full stack JavaScript developer focused on fast interfaces built on well-modeled data. I built the main screens of an AI-powered education platform and designed, end to end, an industrial maintenance management system that is in production. Before coding, I spent 15 years in industry managing data and processes.

5 years of coding	**~20,000** users at Tecla Academy	**160 · 11** users · industrial plants	**95+** Lighthouse standard

EXPERIENCE

Frontend Developer · Tecla Academy — Oct 2023 – Present

Education platform with an AI tutor · React · TailwindCSS · DaisyUI · React Query

- Built the platform's main screens from design: landing, home, content, settings, lessons, groups and reports.
- Adapted a desktop-first platform for mobile after usage metrics showed most users accessed it from their phones.
- Developed the custom hooks that extended the Redux to React Query migration across the platform: fewer requests and a more consistent cache.
- Review the visual and pedagogical quality of AI-generated learning tools.

Freelance Full Stack Developer · TecnoApp IN PRODUCTION — Jun 2021 – Present

Own HVAC maintenance management product, in use at Tecnoclima S.A. since 2023 · MongoDB · Express · React · Node.js

- Designed and built end to end the system that replaced a local Access database: data model, API, role-based UI and deployment.
- 160 active users manage 2,900 HVAC units across 11 plants, with 22,000+ work orders logged since 2024.
- Cut work-order data entry from a 3-day average (up to 2 weeks) to same-day.

Frontend Developer · LaTech — Mar 2023 – Oct 2023

Software agency, e-commerce client · Preact · JavaScript · ESLint · Prettier

- Implemented component variants for A/B testing and introduced formatting and linting git hooks that the team adopted.

Frontend Developer · Kelp Digital — Mar 2022 – Sep 2023

Software startup, international English-speaking team · SvelteKit · TailwindCSS · DaisyUI

- Built the Kelp Digital and Anagolay websites end to end, keeping a 95+ Lighthouse standard (96–98) through image, loading and SEO optimization.

Frontend Developer · Janis Commerce (Fizzmod S.R.L.) — Dec 2022 – Feb 2023

- Components and Storybook documentation for dynamic views generated from JSON configuration. React · Storybook

QA Automation Engineer (Trainee) · Globant — May 2021 – Dec 2022

- Automated tests for Citi Mexico's mobile banking app on Android and iOS. Java · Selenium · Appium

Code Review Tutor · Tecla Coding Academy — 2021 – 2023

- Reviewed students' full stack projects and gave constructive feedback on their code.

SKILLS

Frontend	JavaScript · React · SvelteKit · Preact · HTML · CSS · TailwindCSS · DaisyUI · React Query · Redux
Backend & data	Node.js · Express · MongoDB · SQL (PostgreSQL) · Sequelize · REST APIs
Quality	Selenium · Appium · JUnit · Lighthouse · ESLint · Prettier · Web accessibility
Tools	Git · GitHub · GitLab · Storybook · pnpm
Languages	Spanish (native) · English (C2)

EDUCATION

- **Full Stack Developer** · soyHenry · 2021
- **Teaching Certificate** for technicians and professionals · Instituto Privado Ramallo · 2018
- **Industrial Engineering** · UTN (National Technological University), San Nicolás · 2011

PREVIOUS CAREER

- **Tecnoclima S.A.** · Site Administrator · 2013–2018: equipment database, budgets and management reports.
- **EDEN S.A.** · Technical Support · 2006–2011: geo-referenced database, SQL and functional testing.
- Also: quality, supervision, teaching and plant operations (2011–2021).
